SYSTEMS SERVICE TRAINING WORLDWIDE

TRAINING

Compressor Service

Excellence

EXPERIENCE FOR YOUR BENEFIT

BAUER compressors are field-proven in a multitude of diverse high pressure applications worldwide. More than 60 years of experience and research and development are available to you to help solve your high pressure air or gas requirement no matter if it is a common or unique application. We are world renowned for reliability and durability, and BAUER as a company is recognized as the world's foremost innovative designer and manufacturer of high pressure compressors of the very highest quality.

BAUER is especially capable of working with clients on a worldwide basis because of our vast network of sales and service centers around the globe. BAUER'S U.S. operations include branch offices in Michigan, California and Florida. We specialize in all high pressure market segments including breathing air, plastics technology, industry, helium recovery, natural gas and nitrogen generation in addition to many other common and unique applications.

LEARN FROM THE COMPRESSOR EXPERTS

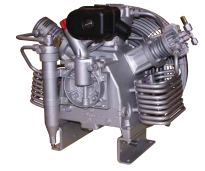

We are pleased to offer our customers training in the operation, maintenance and service of BAUER products. Courses are held at our Norfolk, Virginia on-site training facility and are taught by the same people who manufacture, test, and service our products. From electrical systems to hands-on breakdowns, we cover all areas of compressor operation.

Training provides a basic understanding of the workings and service techniques of a BAUER compressor system. At the completion of the course, students should be able to perform the basic maintenance required for their compressor.

SERVICE AND REPAIR TRAINING

- Basic mechanical theory and troubleshooting
- Basic control system theory (electric/pneumatic) and troubleshooting
- Purification systems
- Gas drying systems
- Basic units / parts nomenclature
- Parts ordering procedures
- Warranty policies and procedures
